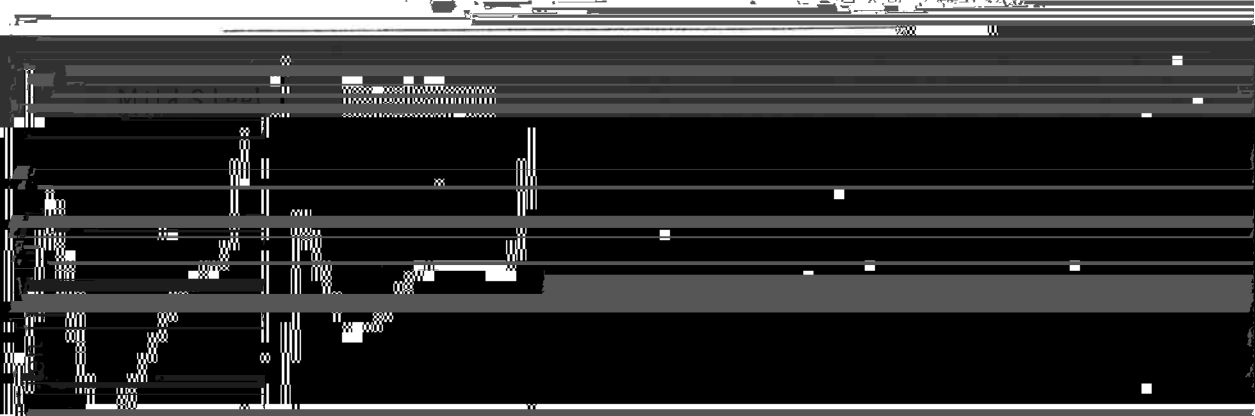

Figure 1: A line graph showing a fluctuating trend over time. The graph has a grid background and a single data series represented by a solid line with small markers at each data point. The line starts at a low point, rises to a peak, falls to a trough, rises to a second peak, and then falls again. The axes are not labeled with values.

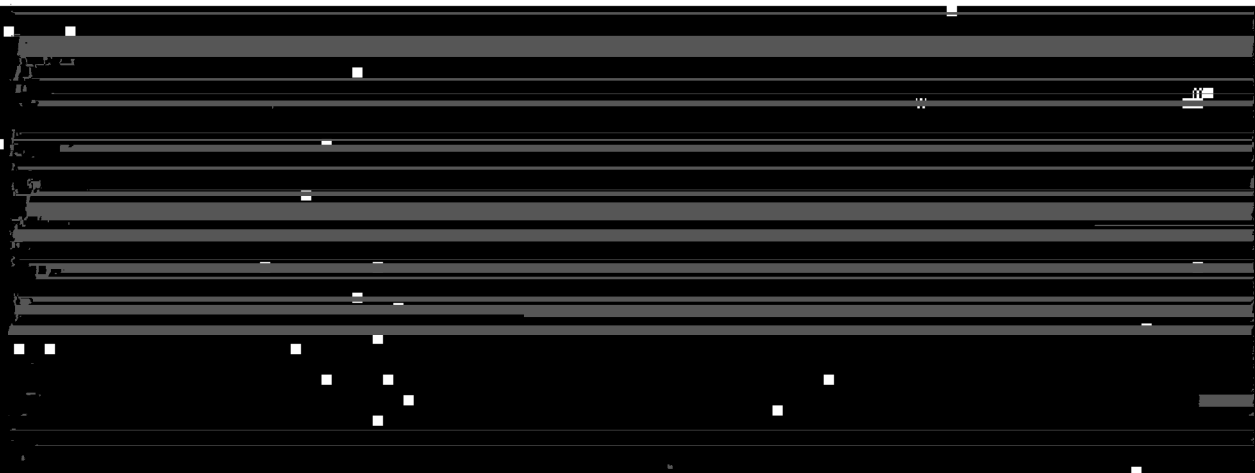

Figure 2: A line graph showing a fluctuating trend over time. The graph has a grid background and a single data series represented by a solid line with small markers at each data point. The line starts at a low point, rises to a peak, falls to a trough, rises to a second peak, and then falls again. The axes are not labeled with values.

Figure 3: A line graph showing a fluctuating trend over time. The graph has a grid background and a single data series represented by a solid line with small markers at each data point. The line starts at a low point, rises to a peak, falls to a trough, rises to a second peak, and then falls again. The axes are not labeled with values.
