

Review

1. The first part of the review discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial statements and for providing a clear audit trail. The review also highlights the need for regular reconciliations to identify and correct any discrepancies as soon as possible.

2. The second part of the review focuses on the internal control system. It emphasizes the role of the internal control system in preventing and detecting errors and fraud. The review identifies several weaknesses in the internal control system, such as inadequate segregation of duties and insufficient monitoring. Recommendations are provided to strengthen the internal control system and reduce the risk of errors and fraud.

3. The third part of the review discusses the importance of communication between management and the auditor. It emphasizes the need for management to provide the auditor with all the information needed to perform the audit. The review also highlights the importance of the auditor providing clear and concise communication to management regarding the results of the audit. Recommendations are provided to improve communication between management and the auditor.

4. The final part of the review discusses the importance of the auditor's independence and objectivity. It emphasizes the need for the auditor to remain independent and objective throughout the audit process. The review also highlights the importance of the auditor's professional judgment and skepticism. Recommendations are provided to ensure the auditor's independence and objectivity.

$$N = \frac{L}{H} = \frac{L}{\frac{W}{4\sigma}} = \frac{4L\sigma}{W}$$

$$H = \frac{L}{N}$$
